## Renewing Ireland

- **Supporting Job Creation:** 20,000 new jobs have been created in the green economy in areas such as renewable energy, information technology and green infrastructure. The Green Party is committed to continued investment and government support for these newly growing industries, which will benefit the highly educated and skilled workforce in Dublin West.
- **Protecting Investment in Education:** We will continue to invest in education to keep student-teacher ratios down and build new schools. We will oppose any attempts to re-impose 3rd level fees.
- **Fighting Bad Planning:** Locally, the big parties are still voting for crazy planning decisions against the objections of residents. Roderic will continue to fight these.
- **Political Reform:** The Green Party is committed to a complete overhaul of Ireland's constitution. Ban corporate donations to end the influence of bankers and developers in politics.

Dear voter,

The next Government will shape Ireland's recovery. It is essential to have a green voice in the Dáil to keep issues like investment in education, fighting bad planning and political reform on the national agenda. By giving me your No. 1 vote, you ensure that the big political parties cannot ignore these crucial issues.

Roderic O'Gorman
