**CLONDALKIN
PAPER
MILLS LTD.**

CLONDALKIN, CO. DUBLIN IRELAND

C.P.M. BOND 80 g/m²

Paper making, invented by a Chinese court official named TS'AI LUN in the year A.D. 105, reached Ireland in the seventeenth century.

The first recorded Irish paper maker was a Huguenot refugee, Nicholas Dupin, who manufactured writing paper. The first paper machine was installed during the nineteenth century, in the Swiftbrook Mill, owned then by the McDonnell family.

Several mills were later active in the Camac Valley during the nineteenth century, including one at Clondalkin which shut during the early 1920's. The present Clondalkin Paper Mills was started in 1936 and grew rapidly to its present capacity, comprising 3 paper machines and a separate Pulp division.

Our library ranges from Woodfree and Mechanical content, Graphic and writing papers, to packaging papers of all kinds.

The Clondalkin Paper Man will guide and assist you, being a paper man himself he's well equipped to meet your special needs. So next time...
